

# AI Prescription Healthcare

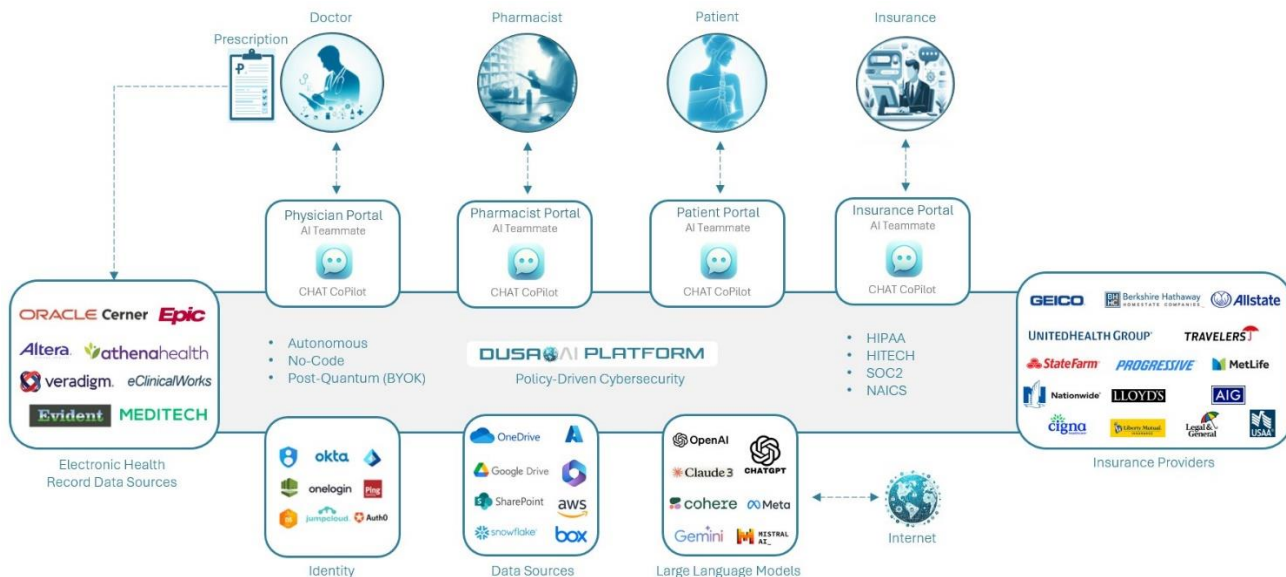

## Doctor, Pharmacist, Patient and Insurance

The Dosanjh USA (DUSA) AI Platform leverages Generative AI (GenAI) and ChatGPT CoPilots to ensure that patients receive their prescriptions in a timely and reliable manner. This new capability prevents prescription errors due to the elimination of printed forms and the utilization of digital processes. The benefits are as follows:

- **Patient:** Accurate prescription fulfillment in a timely manner
- **Doctor:** Digital prescription form for entry into the Electronic Health Record system
- **Pharmacist:** Obtains the correct prescription and can verify via the GenAI CoPilot
- **Insurer:** Augments AI Insurance Teammates for any complex insurance questions

## Business and Technology Workflow

- **Patient Records:** Electronic Health Record Systems
- **Identity Providers:** Single-Sign On and Permissions
- **Data Sources:** External, third & fourth-party data enrichment sources
- **Large Language Models:** Selection of business approved LLMs for CoPilot Prompts
- **Insurance Providers:** Integrated into authorized insurance agent data systems

The opportunity to eliminate errors with prescription orders and expedite prescription fulfillment is the value provided by the DUSA AI Platform. The Patient receives their prescription while ensuring their medical insurance provides the appropriate coverage. Contact us to learn more.
